John – JW wants me to be available for any help with some Widget fixing. I think it is with the static widget of R6. I don't know how I can help. I would be glad to look at it. I don't know how quickly we can do it.

Same mind here. We actually talked about that with Ryan. There is a lot more room to add functions specific to a site

John,

The subscriptions are what have passwords when subscribing via scribe.

Your database service is already providing the appropriate password for its subscription.

So if they are making it into your database you don't have to worry about any other passwords. Security of the data at that point is on you.

Can you please confirm that the 3 scribe projects in the attached file do not have passwords? If they do have passwords, can you please provide? I need these ASAP in order to deploy some tools for the current ER.

Thanks,

Hi Jeffrey,

Sorry, but we are not at liberty to distribute subscription information. Please contact Region 6 and Region 9 contacts for that information.

Region 6 is Eric Delgado

Region 9 is Randy Nattis

Thanks,
